

WYSE 55 Terminal Parameters

- 1) Press the <**Shift**> and <**SetUp**> keys to display the Setup Directory screen. Setup Menus are accessed by pressing the corresponding Function Key (indicated at the bottom of the screen).
- 2) Press a Function Key to access the Setup Menu.
- 3) Use the arrow keys to select a parameter.
- 4) Press the <**SPACEBAR**> to change the option for the highlighted parameter.

The recommended settings are:

F1 (Disp)	Columns = 80 Lines = 24 Page = 1 x Lines	Cursor = Blink Blk Display = Dark Autopage = Off	Scrn Saver = Off Char Cell = 10 x 16 80/132 Clear = Off
F2 (Genrl)	Personality = TVI 925 Scrl = Jump Rcv CR = CR	Enhance = On Autoscrl = On Monitor = Off	Status Line = Off Wrap EOL = On Recognize DEL = Off
F3 (Keybd)	Keyclick = Off Keylock = Caps	Repeat = On Language = US	Keycode = ASCII Corner Key = Meta
F4 (Comm)	Comm = FDX Mdm Rc Hsk = XON- XOFF/XPC Aux Rc Hsk = None	Xmt Lim = None Mdm Rc Hsk Level = 192 Send ACK = Off	Answerback Mode = Off Mdm Xmt Hsk = XON-XOFF Aux Xmt Hsk = None

F8 (ANSI2)	Print = All Send = All Xfer Term = Cursor	Print Area = Page Send Area = Page Auto Answerback = Off	Print Term = None Send Term = None Keys = Typewriter
F9 (TABS)	Undefined		
F10 (Ansbk)	ANSWERBACK=		
F11 (Fkeys)	(see next section)		

- 5) To save the parameters, press <**F12**>.
- 6) Press the <**SPACEBAR**> until "**All**" appears in the field beneath the **Save?** setting.
- 7) Press <**F12**> to exit setup mode.

To program function keys:

The Wyse 55 does not restrict the number of characters associated with one function key; it sets a maximum number of characters (64) for all the function keys taken together.

- 1) Press the <**Shift**> and <**SetUp**> keys to display the Setup Directory screen.
- 2) Select the Fkeys category by pressing the <**F11**> key.
- 3) Hold down <**Ctrl**> and press any function key.
- 4) Use the up and down arrow keys to program either the "shifted" (**F3** =) or "unshifted" (**sF3** =) state of the function key by highlighting the appropriate box
- 5) Enter the desired data for the chosen key.

Tips

- a. Use the left arrow key (not <**BackSpace**>) to erase characters.
- b. Press <**Home**> to clear an entry entirely.
- c. Press <**Return**> to enter a Return/Send character.

- 6) Repeat Steps 3 - 5 for any additional keys.
- 7) To save the parameters, press <**F12**>.
- 8) Press the <**SPACEBAR**> until "**All**" appears in the field beneath the **Save?** setting.
- 9) Press <**F12**> to exit setup mode.
