

Novell Netware Tips

Forcing the Novell Login Window

- ❖ At the user's Windows desktop, press the **Control Alt Delete** key combination.
- ❖ Press the **Right Arrow** key once.
- ❖ Press the **Return** key twice.

NOTE: *If the computer is set to automatically log into Novell, you must hold the **Shift** key as soon as the second **Return** key is pressed and remain holding until the Novell Window appears.*

- ❖ The *Novell Login Window* should appear on the screen.

Admin Login

- ❖ At the *Novell Login Window*, click the **Workstation Only** box.
- ❖ Type in **Administrator** for the username.
- ❖ Type the current SANS admin password.
- ❖ Press the **Return** key.

NOTE: *The new Dell Optiplex SFF 755 computers require an extra step prior to pressing the **Return** key --- You must click the **Advanced** button below, then select the **Windows** tab, and finally choose the user's computer from the list for **FROM** before pressing the **Return** key.*
