

How to Stop the Eudora Header or Footer from Printing on a PC

If you want to stop the header or footer from printing, when you send your email message to the printer:

Stop the Header

- ❖ Create a new message
- ❖ Type in the body of the message: **x-eudora-option:printheaders=0**
- ❖ When you press the **Return** key, the text above will show up in blue as a URL. Now, hold down the **ALT** key and click on the blue text.
- ❖ When the dialog window appears, click the **OK** button. This will eliminate the header. At this point you can discard this message

Stop the Footer

- ❖ To eliminate the footer "Printed for xxxx", change the above line typed in the body of the message to say footers instead of headers: **x-eudora-option:printfooters=0**
- ❖ The text should continue to show up in blue as a URL. Now, hold down the **ALT** key and click on the blue text.
- ❖ When the dialog window appears, change the highlighted value to **1** and click the **OK** button. This will eliminate the footer. At this point you can discard this message.
