

How to make a CD Copy Using the Mimic CD Burner

Mimic Computer

- If the Mimic computer is not on when you sit down, Press the *computer power* button.
- When the Novell Client32 dialog box appears on the screen, login with your username/password and press the **Return** key.
- When the Windows Workstation dialog box appears on the screen, select the **OK** button.

Mimic CD Burner

Place your Blank Recordable CD-R or CD-RW in the CD Burner (2nd CD drive down from the top) and the CD you want to copy from in the CD Drive (1st CD drive from the top) of the Mimic computer.

Mimic Computer

1. Open CD Copier, by going to the **Start** menu, selecting **Programs**, selecting **Mimic Software**, then choosing **CD Copier**.
2. In the *CD Copier* window, the source and destination will be displayed. Make sure you have the correct CD's in the correct drives. To make a copy of a CD, click on **Copy**. A message will be displayed when the copying is complete. Exit the program and remove the CD's from the drives by pressing the eject buttons for each drive.
3. Test the copies as sometimes a failure occurs.
